### Student Survey Responses - Unofficial Report

**Term:** Spring 2006  
**Survey:** 21  
**Subject:** ECE 4112 A - Internetwork Security  
**CRN:** 25107  
**Class Size:** 39  
**Instructor:** Owen, Henry Walter Lilly

*report run @08/17/2006 05:09 PM*

**Student Comments about individual question**

1. Course Seemed Well Planned And Organized
   *Some Of The Labs Contained Errors.*
   *Some Of The Labs Had Mistakes In Them That Made Them Difficult To Follow.*

2. Good Job Covering Course Objectives/Content
   *You Didn"T Cover Anything, But I Think You Should At Least Briefly Introduce The Lab Topics.*

3. Explained Complex Material Clearly
   *Didn"T Explain Anything, Thanks Google.*
   *Encouraged Students To Explain Complex Material Clearly*

4. Number Of Course Assignments Was Appropriate.
   *Some Of The Labs Were A Little Long, But Overall They Were Appropriate For The Material Covered.*
   *Some Of The Labs Were Too Long While Others Were Too Short.*
   *Sometime Lab A Bit Long*

5. The Instructor Was An Effective Teacher
   *It Would Have Been Nice To Have Had More Lectures From The Instructor. Having The Student Groups Rehash The Lab From The Previous Week Was Kind Of Like Sitting Through Reruns Every Tuesday.*

6. Text, Resource, Etc Contributed To Course Value
   *The Text Was A Good Resource, But The Internet Was More Valuable In Finding Information To Help With The Labs.*
   *Wish I Had Not Have Bought The Text.*

**Student Comments about the Class or Instructor**

Best class at Tech. Period. Thanks Professor for doing so much so that we can have a real hands on class like this that teaches us something useful.

great class, and Dr. Owen does a wonderful job making it fun but tough. one of the very best classes I"ve had at Tech.

great class...need more of these experimentation classes at tech

Some of the labs we had trouble getting everything to work, like the wireless lab. The typos and other mistakes also made some labs harder than they should have been. I felt the final Tiger Team lab didn"t utilize enough of the exploits we learned about in previous labs and could be greatly improved by considering the suggestions discussed in class.
very useful class, perhaps the scope of the class should be reevaluated. For example, currently we must submit lab additions in order to get A, however, it's becoming difficult to find new additions for exiting topics, and there seems to be a tradeoff between the amount of material covered and how well the materials are absorbed. Instead of focusing on adding new material, perhaps points could be awarded to more in depth analysis of existing topics.

This was a great class which provided the needed hands-on experience that has helped throughout my job interviewing process. (It also helped drive home the importance of network security.) Never get rid of this class. The vast amount of knowledge and experience I gained from this class is priceless.

Excellent course! I really enjoyed all the labs and it was great to get "hands dirty" with all this stuff. It would be good though if we had some theory lectures regarding some of the stuff we do in labs (use up that Thursday slot?)
